NEW CONCEPT IN HOSPITAL HYGIENE AND HEALTHCARE

SANILAB
Microfiber Sanitary System

Increased productivity
Modularity
Hygiene

One basic cart
Multiple combinations
Hospital Cleaning Carts
Sanilab cleaning and disinfection cart to use with microfiber tools. It can be adapted to every need and use by adding different accessories to the cart.

- Increased productivity
- More capacity
- Ultra compact
- Hygienic

Note:
Cleaning carts should always remain in corridors or traffic places. Enter into the room only with the tool.
**Velcro and Microfiber Mop**

Microfiber mops can be used both on the wall and the floor. They are an ideal and highly recommended tool to use in healthcare areas such as operating theatres, laboratories and rooms.

Complete mop that includes a microfiber pad and a frame with adjustable Velcro fastener.

This aluminium handle can be adjusted to the required height for each work.

Easily removable pad for a quick replacement.

Rectangular bucket with hermetic lid and wheels.

Rectangular bucket with 22 liters capacity to use with microfiber pads in order to prepare them for disinfection. It has an hermetic lid to prevent the solution from evaporating and the pads from getting dry. Moreover, it includes four wheels to facilitate transport.
Special Microfiber Products

Using microfiber you save time, money and effort!

Productivity increases
- It lasts 10 times more than any other cloth and cleans 3 times faster.
- It reduces working costs up to 15%.

Superior Cleaning Quality
- Cross-contamination is avoided and bacteria on surfaces is eliminated up to 94.5%.
- Four times more effective on porous surfaces.
- It can be cleaned and sterilized at high temperature or with chemical agents.

Ergonomics
- Microfiber pads, like some other elements, are 35% lighter than some other elements.
- The microfiber products are a lot easier to use, clean and decontaminate.

A practical microfiber glove to clean glass, furniture, medical equipment and plasma screens. It can be used either dry or wet.

Microfiber cloths are highly recommended to use in healthcare areas. Available in 5 colors: white, green, yellow, blue and pink to differentiate the working areas. Suggested to clean glass, furniture, stainless steel, plasma screens, computers and televisions.

Caddy tray to transport all the cleaning tools tidily.
Flexible Duster

This flexible mop is the perfect tool to clean hard-to-reach places.
- Flexible head, 51 cm long.
- It can be shaped to easily fit in any angle.
- It includes extensible steel handle or short handle, depending on the need.
Highly recommended to clean air conditioners, ceiling fans, recessed lights, screens, etc.

Demonstrated Microfiber Performance

- Demonstrated textile superiority to remove more than 95% of microorganisms.
- It contributes to reduce cross-contamination.
- It lasts up to 500 commercial washes.
Special Microfiber Products

Using microfiber you save time, money and effort!

Enhanced Productivity
• It lasts 10 times more than any other cloth and cleans 3 times faster.
• It reduces working costs up to 15%.

Superior Cleaning Quality
• Cross-contamination is eliminated and bacteria on smooth surfaces is reduced up to 94.5%.
• Four times more effective to work on porous surfaces.
• It can be cleaned and sterilized at high temperature or with chemical agents.

Ergonomics
• Microfiber mops, like some other elements, are 35% lighter than some other elements.
• Microfiber products are a lot easier to clean, use and decontaminate.

Microfiber Mops / Wet Pads

High Performance Wet Pads
This twisted loop pad is a combination of microfiber and polyester for more resistance and, also, to ease its use. Borders are double finished - overlock - stitched and bound with polyester grosgrain piping for more durability. This construction has been proven to withstand over 300 commercial launderings. Wet pads are recommended for a routine mopping, they contribute to a more efficient work eliminating dust, dirt and bacteria from surfaces. Available in two sizes — 40 cm and 60 cm long.

Color - Coded Wet Pads
To prevent cross-contamination, mops can be differentiated by color depending on the area to be cleaned. Each area will be identified with a color.

Material description:
100% microfiber base (Polyamide / Polyester).
Z-Velcro backing, 5 mm long.
Looped end and polytape border.
Descriptive label.
Dry Microfiber Mop / Dusting

Room and Hall Dusting Pad
On its surface, this innovative dry mop features an 8 mm densely woven fringe — 100% microfiber — to collect and hold dirt electrostatically. The cleaning surface is 40 times greater than the ordinary cotton fiber. The largest pads — 80 and 100 cm long — have an additional foam lining to guarantee the mop contact with irregular surfaces.
Available in 4 sizes: 40, 60, 80 and 100 cm

Microfiber Fringe Dry Mop
This mop is bordered with a row of microfiber fringe to efficiently catch and hold dust particles and large debris. The rest of the small particles remain in the body of the cloth.

Material description:
100% microfiber base — loop pile.
Outer yarn: green microfiber fringe (looped-end).
Z-Velcro Backing, 5 mm long.
Looped-end and green polytape border, 20 mm long.

Frames with velcro
Underneath, these frames have a Velcro that allows the microfiber mop to adhere easily on it.
- Very light ABS construction to increase productivity.
- An easy and fast adjustment mechanism to the handle.
- Flat frame profile easy to clean and sanitary, as well.
- Angled ends to reach corners.

Microfiber mops can be used to clean floors and walls. Suggested in healthcare areas such as laboratories, operating theatres and rooms.
Ergonomic Aluminium Handle

Manufactured in very durable aluminium alloy, light and easy to use.
- Extensible to a length of 2 meters to clean walls and tiles.
- Comfortable fastening handle.
- Smooth to reach better hygiene and maintenance.

Complete Kit

Set of frame, microfiber mop and ergonomic handle.

How To Use Microfiber Pads

TIPS

- To avoid cross-contamination use a different pad for each room.
- The personnel must wear appropriate clothes, gloves and safety glasses.
- The microfiber pads system contributes to cleaner and more secure floors.

Note: Microfiber naturally contains electrostatic charge and facilitates the retention of small particles.
